

Using the CP4BA Pak Installer 22.0.2 Openshift VMWare image

Table of Contents

<i>Introduction.....</i>	<i>2</i>
<i>1- Provision Your Environment</i>	<i>2</i>
<i>2 Validate your environment</i>	<i>6</i>

Introduction

The following step-by-step instruction will detail how to use the Pak Installer to get your pre-configured CP4BA 22.0.2 environment that will be suitable to setup the following demo:

- Predictive Decisioning
- Content Management

The Pak installer provides an easy way to get a pre-configured OpenShift Image containing the Cloud Pak for Business Automation components of your choice.

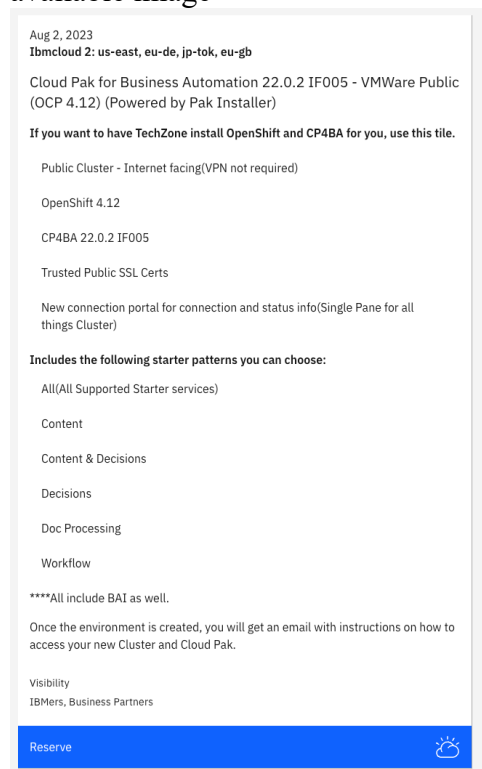

This Pak Installer is only available for CP4BA 22.0.2 IF02 at this time.

1- Provision Your Environment

Step 1.1 Log in TechZone (<https://techzone.ibm.com>) using your IBM ID

Step 1.2 Go to the Pak Installer Cloud Pak for Business Automation collection page:
<https://techzone.ibm.com/collection/PakInstaller/journey-cloud-pak-for-business-automation>

Step 1.3 Click reserve on the CloudPak for Business Automation 22.0.2 – VMWare Public available image

Step 1.3 Click **Reserve now**.

Name

Cloud Pak for Business Automation 22.0.2 IF005 - VMWare Public (OCP 4.12) (Powered by Pak Installer)

Name this reservation. This will help identify it in your reservation list.

Purpose

Customer Demo
Showcasing a pre-built, standardized product use case with minimal customization needed on the environment for a client demonstration. Aligns with "Custom Demo" in IBM Sales Cloud.

Proof-of-Technology
Customizing an environment to set up and personalize beyond the pre-built option to showcase a specific customer use case. Typically these environments are needed for a longer period of time. Aligns with "Proof of Value" in IBM Sales Cloud.

Practice / Self-Education
Gaining experience with specific technology, product, or solution.

Test
Need to test a specific function, configuration, or customization.

Please ensure to select the correct purpose as this can NOT be updated or changed after this reservation has been created. Review the [Reservation Duration Policy](#) to understand default durations allowed for specific infrastructures based on purpose.

Preferred Geography

Step 2.2 Click the Cloud Pak Console Tab

The screenshot shows the Pak Installer portal interface. At the top, there is a navigation bar with five tabs: Instructions, Bastion, OpenShift Console, Cloud Pak Status, and Cloud Pak Console. The Cloud Pak Console tab is highlighted with a red box. Below the navigation bar is a search bar and a navigation menu. The main content area displays instructions for the Cloud Pak Console, including a 'Table of contents' and a 'Pak Installer Portal' section. The 'Table of contents' lists: Over all Process, Status Email Messages, and Pak Installer Portal. The 'Pak Installer Portal' section lists: Tabs, Instructions, Bastion, OpenShift Console, Cloud Pak Status, and Cloud Pak Console.

Step 2.3 Take a note of all the URL and logins you will need for your demos (The required URLs are detailed in the **Bookmark your URLs** step in the PREPARE section of the demos)

Runtime Monitor Password : zw66w66faw94tcdz

Step 2.3 bis

If you don't see the URLs you are looking for, you may have to wait for 1 or 2 additional hours.

The best way to validate your install is:

1. Log in your OpenShift Console
2. Go in the Workloads/Config Maps view
3. Select the cp4ba-starter project
4. Search for "access"
5. Open the icp4adeploy-cp4ba-access-info
- 6.

All the URLs are and passwords are listed in this file. Your CP4BA install is finalized when the ADS credentials are listed in this file.

All these steps are documented in your demo PREP instructions – Validate your OpenShift Environment section
